Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 7, and 10-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Snow (3204347).

Snow shows a shoe with an insole (30), an outsole (32), a specifically –oriented receptacle (10) and means for permitting the receptacle to be oriented in only one possible position (holes in the outsole and flanges interconnecting individual receptacles (26)) as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6, 11-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heller (6301806) in view of Snow.

Heller shows a shoe with an outsole (10), a specifically –oriented receptacle (55) with a flange (outer edge portion of 55) and means for permitting the receptacle to be oriented in only one possible position the shape of the hole in element 10 and the shape of the receptacle 55 (see figure 1a) substantially as claimed except for an insole. It is

well known and conventional to provide insoles in shoes. Snow teaches the well known and conventional practice of providing insoles (30) over outsoles with clear receptacles thereon.

Allowable Subject Matter

5. Claims 8, 9, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
